

Implement a collapsible notepad dialog like shown on the diagram below:

Implement a “support chat” modal view, which will be used to the support team in the platform.

### Requirements

- It should look like an icon in the lower right corner of the screen when minified.
- It should expand into a modal dialog with an ability to append quick notes.
- Appended notes are shown in the dialog just above the “**Input field**” and the “**Add note**” button.
- The delay between the click on the “**Add note**” button and the update in the list inside the dialog window should be 1 second.
- The contents of the list should also be displayed on the page itself even when the notepad dialog is minified. The delay between the click on the “**Add note**” button and the update on the page itself should be 2 seconds.
- The task should be covered with tests.
- Mimic **Record Union**’s design language as closely as possible. ([www.recordunion.com](http://www.recordunion.com))
- Any open source libraries can be used in the process of development.
- Upload the completed assignment to your GitHub account.
